## THE DEATH OF PRESIDENT MCKINLEY.

Last Friday hope was turned into despair as to the condition of President McKinley, and at 2.15 A. M., Saturday, his earthly career was ended. His last hour of consciousness was spent with the wife upon whom he bestowed years of devotion and care. The immediate cause of death, as revealed by the autopsy, was gangrene where the bullets took their deadly course. Sunday afternoon the body of the departed President lay in state in the City Hall, Buffalo, and was viewed by 80,000 people. On Monday a special train over the Pennsylvania Railroad conveyed the remains, and the funeral party, including the members of the Cabinet and other public officials, to Washington. All along the line there was manifested both sorrow and respect, and at every stopping place great crowds of citizens had gathered to do reverence to the memory of the martyred President. Funeral services were held in the rotunda of the Capitol, Tuesday morning, where the body lay in state for the remainder of the day, and was viewed by thousands of people. On Wednesday the funeral train left Washington for Canton, Ohio, where the last services and rites will be observed at the old home of the departed President to-day. \* \* \* The whole nation has suffered a great loss in the death of President McKinley. He was a noble, honest-minded man, and his statesmanship broadened under the responsibilities of his high office. His love for his fellow countrymen was keen and abiding and his highest aim was the faithful performance of his official duties. The nation may well mourn the loss of such a President and such a man!

The ticket placed in the field by the Democratic Convention at Norristown, Tuesday, has some elements of weakness; but upon the whole it is entitled to the consideration and support of Democratic voters.

LIEUTENANT PEARY has been heard from to the effect that he is safe, that he has reached the highest latitude yet attained on this hemisphere, but that the great mystery of the North still remains unsolved.

JUDGE ELI TORRANCE, of Minneapolis, was unanimously elected Commander-in-Chief of the Grand Army of the Republic at Friday's session of the annual convention at Cleveland. While the balloting was in progress the name of General Thomas A. Stewart of this State was withdrawn.

It is quite proper that Editor Haldeman of the Harleysville News should receive the congratulations of his brethren of the press, upon his nomination to the office of High Sheriff by the Republicans of Montgomery county, and there is no sufficient reason why he should not receive the cordial support of Republican voters and be among the winners at the November election.

ANARCHY is one of the diseases of Society. It is propagated in part by a licentious press and other forms of character assassination. The greatest curse of modern civilization are the so-called newspapers that thrive upon character defamation and the sensationalizing of the doings of individuals whose brains are diseased.

VICE-PRESIDENT THEODORE ROOSEVELT became President of the United States by taking the oath of office at Buffalo on Saturday at 3.30 P. M. The new President has declared it to be his purpose "to continue absolutely unbroken the policy of President McKinley for the peace, the prosperity and the honor of our beloved country." We believe President Roosevelt to be well equipped to fulfill the requirements of the Presidency, and feel assured that his strong individuality will help to make his administration generally successful.

THERE are about eighty millions of people in the United States, representing nearly all types of the genus homo; all phases of complex civilization. The vast majority are normal minded. The small minority comprise an assorted lot of abnormal characters whose mental equilibrium is far from stable, whose brains are disordered either by the force of heredity or by the influence of their surroundings, including the false impressions made by false teachers. Among them are those who utterly fail to comprehend the meaning of human liberty. Liberty to them means license to destroy the very foundations of Society. It is not strange, therefore, that there should exist a given number of miserable wretches who believe that it is their mission to shoot and kill Presidents and Kings. It should be one of the functions of government to effectively restrain these destroyers of liberty and of life, and to adequately protect public officials from their bullets.

## WASHINGTON LETTER.

From Our Regular Correspondent.

WASHINGTON, D. C., Sept. 12, 1901.—Next to the intense interest manifested in relation to the President, the absorbing subject is to-day the Schley-Sampson controversy, for the Court of Inquiry began its session to-day. In many respects the Schley-Sampson controversy promises to be celebrated. Two centers of interest are discussed. Will Sampson's health permit his presence as a witness? Will Schley succeed in challenging and retiring Admiral Howison from the Court? As to the former proposition, the opinion is general that Admiral Sampson is not in good health and that this fact may be the reason given should he decide not to testify for any reasons appearing later in the investigations. On the other hand, it is thought that if he chooses to appear as a witness, the state of his health will not interfere, the time and circumstances being arranged to suit his condition. As Admiral Sampson made the original indictment against

Admiral Schley in his charge of incompetency and insubordination, it seems fitting that he should in some form be a party to the controversy. The dislike for the press has not abated in Army and Naval circles. The Army and Navy Club of Washington, the most exclusive club in the country, is frequently the scene of rigorous denunciation of the press, the consensus of opinion being that newspaper statements are wholly unreliable. An admiral prominent in authority made the statement last evening that when he saw a newspaper article he said, not how much of this is true, but, is any of it true? The admiral was frank enough to admit that he did not intend to include all papers in his remark (but his exceptions were not enumerated). These facts add interest to the trial and it is not surprising that the entire subject is a matter of daily discussion. Judge Advocate General Lemly has gone over the testimony with the various witnesses preparatory to the trial in order to eliminate all unnecessary matter and classify the evidence.

The difficulties in the way of the success of the Pan-American Congress of Mexico this fall have been removed by the acquiescence of the government of Peru in the plans as originally outlined. Peru objected to some of the terms, or more properly, wanted the scope of the conference enlarged to consider boundary differences and other difficulties existing between South American republics. Other countries followed Peru's lead in this, and for a time it appeared that the conference was a trade congress would prove a failure. The information is confirmed by the Peruvian Minister that all objections have been withdrawn and a delegation has been named. This action followed by that of the other countries will organize the congress as originally designed. Consul General Stowe has arrived from Cape Town. He says that British trade is evasive of the vast strides made during the last four years in the exports of the manufactures and products from the United States to British colonies and dependencies. The Consul says the statistics published are unreliable because of the entire absence of figures from Delagoa Bay.

It is said that the late attempt upon the life of the President, in the midst of a reception, such as is given frequently in Washington when several thousand people shake hands with him, will result in the permanent discontinuance of these functions. There is no reason why the President should be expected to undergo the fatigue, to say nothing of the danger of these crushes. No other head of a great nation has ever submitted to them. Their discontinuance will not interfere with the accessibility of the Executive to those who really have business with him, but the crowd at receptions must be filtered through an anti-chamber and the name and address of each caller must be taken. It is not impossible that, with the great improvements in the photographic art, snapshots may be taken and doubtless the detective force about the President can be so strengthened and increased by experts familiar with the physiognomy of anarchists that it will be impossible for a suspected person to approach the Executive. It is evident, moreover, that there will be both State and Federal enactment for the suppression of anarchy and for the deportation of anarchists. They have heretofore been tolerated but hereafter the confession of anarchism or of anarchistic sympathy will be treated as treasonable crimes and they will be punished as enemies of the State and of mankind.

Considerable interest is being taken in the plan to start a fund for the purpose of a home in Washington for James B. Parker, the colored man whose prompt action at the time of the attack upon President McKinley last week is credited with preventing the anarchist from firing a third shot. It has been decided by a committee appointed at a meeting in the Metropolitan A. M. E. Church, of this city, Tuesday evening, that the local newspapers be requested to receive contributions to the fund.

## CAREER OF THE LAMENTED PRESIDENT.

William McKinley, third American President to perish by an assassin's bullet, was born at Niles, O., on February 26, 1843. His father was a native of York county, Pa. Educated in public schools of Niles and in Allegheny College, Meadville, Pa. Left college because of ill-health and never graduated. Enlisted in Twenty-third Ohio Volunteer Infantry on July 11, 1861, as a private soldier. Served through the Civil war with great credit, reaching his captaincy on his 21st birthday. Was with General Sheridan at Winchester. Was also on the staff of Gen. Hancock. Admitted to the bar at Warren, O., in March, 1867.

Elected prosecuting attorney for Stark county, O., in 1869; failed of re-election in 1871. Nominated for Congress in 1876 and elected as a Republican. Spoke before the Union League in Philadelphia during the campaign, and scored a success that won him an enviable reputation as an orator. Re-elected to Congress in 1878, and served continuously until 1891. He was beaten in the Congressional election of 1890, and in 1891 was elected Governor of Ohio.

On April 16, 1890, he introduced the famous McKinley Tariff bill. In 1893 he was re-elected Governor of Ohio. Nominated for President by the Republican National Convention at St. Louis in June, 1896. He was elected by a popular vote of 7,104,799, a plurality of 601,854 over Bryan, his principal opponent; received 271 votes in the electoral college, against 176 for Bryan. Again nominated for President by the Republican Convention, at Philadelphia, in June, 1900, and was subsequently re-elected over Bryan by a popular vote of 7,208,244, a plurality of 845,455 over Bryan, and a popular vote of 457,045 over all opponents.

Was assassinated by Leon Czolgosz, an anarchist, while holding a reception in the Temple of Music, at the Pan-American Exposition, at Buffalo, on September 6, 1901.

Have you a sense of fullness in the region of your stomach after eating? If so you will be benefited by using Chamberlain's Stomach and Liver Tablets. They also cure belching and sour stomach. The bottles, too. Price, 35 cents. Sold by W. P. Fenton.

## PORTO RICO'S FIRST RURAL SCHOOLS.

From The World's Work.

To found an educational system was also part of the great work in Porto Rico. Think of 350,000 children of school age and not one school house owned by the public on the island! But systematic and vigorous execution soon told, and to-day there are 40,000 children being taught by capable instructors and thirty modern American school houses being constructed. In April the Columbus Rural School was dedicated at Carolina. This was the first rural school house ever built in Porto Rico. It looks like a New England school house, capable of holding forty pupils, is painted the common lead color, has anterooms, blackboards and comfortable American desks and seats. The flag flies over the top. "The Star Spangled Banner" is sung by the children. English is taught, and those who attend are bright, intelligent, ambitious. It is noticeable, too, that educational interests meet with hearty co-operation among Porto Ricans of all classes, rich and poor, influential and humble.

## EAGLE BATTLES WITH WILDCAT.

San Rafael Citizens View an Exciting Duel on the Footpaths.

From The San Francisco Call. A fierce duel between a wildcat and an eagle was recently witnessed by City Attorney Thomas P. Boyd and a friend as they were returning from Bolinas. It resulted in a victory for the bird, which killed its adversary and made an attempt to bear away its carcass.

"I was about half way up the Bolinas side of the ridge when my attention was attracted to a patch of short sagebrush on the hillside above the road," said Mr. Boyd in describing the fight. "That there was something doing was evident from the cries and the sound of breaking brush that came from a small clearing in the center. Clouds of dust arose above the short brush as two objects tumbled about on the ground. For some time I watched the spot, unable to determine what the combatants were. My friend and I both resolved to referee the fight, but from a distance.

"After we had watched for several minutes we were surprised to see a large eagle rise from the brush a distance of about ten feet and then swoop down again and continue the fight. It did this several times, until finally after one of these fierce onslaughts, there was only a brief struggle and then the commotion ceased.

"Soon the great bird soared upward, carrying in its talons a large wildcat. I was not more than eighty yards distant at the time. The cat wriggled and clawed weakly. The eagle had it by the back. After the bird cleared the brush with its prey it sailed over the canyon to the west, gradually rising in its flight. After crossing Bourne Gulch the bird began to soar upward until it had attained a height of perhaps five hundred yards. Then its prey fell from its talons, and like a tiny speck shot downward to the gulch below. The eagle, after losing its burden, made several downward swoops after it as the cat was falling. These swoops did not only half-hearted efforts, however, and the bird sailed away over the ridge toward the Lagunitas timber. The eagle had about a ten-foot spread to its wings.

Until a few months ago eagles were almost unknown in this country. About two months ago Thomas Sutton, a vaquero, lassoed one at Navato.

You assume no risk when you buy Chamberlain's Colic, Cholera and Diarrhoea Remedy. W. P. Fenton will refund your money if you are not satisfied after using it. It is everywhere admitted to be the most successful remedy in use for bowel complaints and the only one that never fails. It is pleasant, safe and reliable.

## THE HOME GOLD CURE.

AN INGENUOUS TREATMENT BY WHICH DRUNKARDS ARE BEING CURED DAILY IN SIGHT OF THEMSELVES.

NO NOXIOUS DOSES. NO WEAKENING OF THE NERVES. A PLEASANT AND POSITIVE CURE FOR THE LIQUOR HABIT.

It is now generally known and understood that Drunkenness is a disease and not weakness. A body filled with poison and nerves completely shattered by periodical or constant use of intoxicating liquors requires an antidote capable of neutralizing and eradicating this poison, and destroying the craving for intoxicants. Sufferers may row cure themselves at home without public exposure or loss of time.

WIVES CURE YOUR HUSBANDS! CHILDREN CURE YOUR FATHERS! This remedy is in no sense a nostrum but is a scientific and proven cure and is so skillfully devised and prepared that it is thoroughly soluble and pleasant to the taste, and can be given to a child as young as a year old.

Do not be misled by the "CURE" advertised by low priced quacks and relatives without their knowledge in coffee or tea, and believe to-day that they discontinued drinking of their own free will. DO NOT WAIT. Do not be misled by the "CURE" advertised by low priced quacks and relatives without their knowledge in coffee or tea, and believe to-day that they discontinued drinking of their own free will. \*\*\*\*\*

A WORTHY SUCCESSOR.

"SOMETHING NEW UNDER THE SUN."

All Doctors have tried to cure CATARRH by the use of powders, acid gases, inhalers and drugs in paste form. Their powders dry up the mucous membrane causing them to crack open and bleed. The powerful acids used in the inhalers have entirely eaten away the same membrane that their makers have aimed to cure, while pastes and ointments cannot reach the disease. An old and experienced practitioner who has for many years made a close study and specialty of the treatment of CATARRH, has at last perfected a treatment which when faithfully used, not only relieves at once, but permanently cures CATARRH, by removing the cause, stopping the discharges, and curing all inflammation. It is the only remedy known to science that actually reaches the afflicted parts. This wonderful remedy is known as "SNUFFLES THE GUARANTEED CATARRH CURE" and is sold at the extremely low price of One Dollar, each package containing internal and external medicine sufficient for a full month's treatment and everything necessary to its perfect use.

"SNUFFLES" is the only perfect CATARRH CURE ever made and is now recognized as the only safe and positive cure for that annoying and disgusting disease. It cures all inflammation quickly and permanently and is also wonderfully quick to relieve HAY FEVER or COLD IN THE HEAD. CATARRH when neglected often leads to CONSUMPTION—"SNUFFLES" will save you if you use it at once. It is no ordinary remedy, but a complete treatment which is positively guaranteed to cure CATARRH in any form or stage if used according to the directions which accompany each package. Don't delay but send for it at once, and write full particulars as to your condition, you will receive special advice and discover of this wonderful remedy regarding your case without cost to you beyond the regular price of "SNUFFLES" and the "GUARANTEED CATARRH CURE."

Send prepaid to any address in the United States or Canada on receipt of One Dollar. Address Dept. B-261, EDWIN B. GILES & COMPANY, 2330 and 2332 Market Street, Philadelphia.

The gray wolf came again. I had made fast the door with chains. How has the gray wolf passed?

My threshold? I have nothing left to give. Do from me now, gray wolf, and let me live! I have fed you once, given all you would, given all I had.

I am poor now; the table is but spread With water and a little wheaten bread. You have taken all I ever had from me. Go from me now, gray wolf, and let me be!

The gray wolf, crouching by the bolted door, Waits, watching for his food upon the floor. I see the hunger and the thirst in his eyes. He waits, but I have nothing, and I stand Helpless, and his eyes fasten on my hand. Oh, gray wolf, gray wolf, will you not depart. This time unless I feed you with my heart!

—Arthur Symonds in Saturday Review.

**A Great Hand at Figures.**

"Yes, my wife is great at mathematics. I sometimes feel that she ought to have gone in for astronomy or something of that kind, where clever handling of figures would bring success."

"You ought to have been here last night. She did some calculating that was simply remarkable. How old do you suppose Mrs. Lammerson is? Forty-three. Yes, sir, my wife has figured it. How did she do it? Well, I don't know that I can explain exactly, but she heard Mrs. Lammerson say yesterday afternoon that she was twenty-three years when she was married, and that two years later they moved to Bristol, where they lived for nine months. Four years after that they lived in London for awhile, and then they spent a year and a half abroad."

"Now comes the clever part of the figuring. While they were in France the lady bought a ring which she wears today. It weighed twenty-one karats when it was new, but probably isn't more than half that heavy at present. This, according to my wife's figures, shows that the ring has been worn at least ten years. All these totals added together, multiplied by two and then subtracted from the age of the pony which Lammerson bought for his wife fourteen years ago, show that she was forty-three her last birthday."

"No, I can't tell just how it's done, but any woman can explain it to you!"

—Tit-Bits.

**The Quaker Witness.**

Quakers are notoriously good witnesses for lawyers on the other side." The late Josiah Hunt of Bristol, a typical Quaker of half a century ago, was called as a witness in a case tried before the recorder. The opposing counsel was an Irishman, who, although possessed of a full flavored tongue, was very anxious to be thought an Englishman. Falling to obtain much information from the cautious replies of Mr. Hunt, the lawyer became rather angry and thus addressed the witness, "Now, Mr. Hunt, be good enough to attend to me and remember, sir, you are on your oath." "Excuse me," said Mr. Hunt, "but I am not."

"Your affirmation, then, sir, I believe, Mr. Hunt, you are a Quaker."

The witness, looking straight at the lawyer, replied, "And I believe thou art an Irishman!"

Every one in court, from the judge to the messenger, knowing the lawyer's weakness, was greatly amused at the Quaker's home thrust, and it is hardly necessary to add that the Quaker was asked no more questions.—Chambers' Journal.

**Lesson in Journalism.**

Professor of Journalism—Mr. Spinks, what would you do if a man fell down in front of the office and stubbed his toe?

Mr. Spinks—I should think the circumstances too trivial to be noted.

Professor—Mr. Spinks, there you would be wrong. In all times, say ten years ago, your course would have been eminently proper, but the larger journalism of today demands larger methods. In the circumstances mentioned your first duty would be to write half a column on the humorous possibilities of the laws of gravitation; next, a column on the different methods of laying sidewalks, with a glance at the brick industry; then half a column of the history of that particular street; and, finally, a reference to the enterprise of your own paper, with quotations from applauding readers. And, by the way, Mr. Spinks, you find out the man's name. Tomorrow the class will present a 2,500 word account of a dog fight in the street, including a 2,000 word consideration of the dog in human sociology from the earliest times.—Boston Transcript.

**AMENDMENT TO THE CONSTITUTION PROPOSED BY THE CITIZENS OF THIS COMMONWEALTH FOR THEIR APPROVAL OR REJECTION BY THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA PUBLISHED BY ORDER OF THE SECRETARY OF THE COMMONWEALTH IN PURSUANCE OF ARTICLE XVII OF THE CONSTITUTION.**

**A JOINT RESOLUTION.**

Proposing an amendment to the Constitution of the Commonwealth.

Section 1. Be it enacted by the Senate and House of Representatives of the Commonwealth in General Assembly met, That the following is proposed as an amendment to the Constitution of the Commonwealth of Pennsylvania, in accordance with the provisions of the eighteenth article thereof.

Section 2. One to Article Eight, Section One.

Added at the end of the first paragraph of said section, after the words "shall be entitled to vote at all elections," the words "subject however to such laws requiring and regulating the registration of electors as the General Assembly may enact," so that the said section shall read as follows:

Section 1. Qualifications of Electors. Every male citizen twenty-one years of age, possessing the following qualifications, shall be entitled to vote at all elections, subject however to such laws requiring and regulating the registration of electors as the General Assembly may enact.

He shall have been a citizen of the United States at least one month.

He shall have resided in the State one year (or, having previously been a qualified elector or native born citizen of the State, he shall have removed therefrom and returned, then six months), immediately preceding the election.

He shall have resided in the election district where he shall offer to vote at least two months immediately preceding the election.

If twenty-two years of age and under twenty-four years of age, he shall have resided at least two months and paid at least one month before the election.

Section 2. Uniformity of Election Laws.—All laws regulating the holding of elections by the citizens or for the registration of electors shall be uniform throughout the State, but laws requiring and regulating the registration of electors may be enacted to apply to cities only, provided that such laws shall be uniform for cities of the same class, so that the said section shall read as follows:

Section 2. Uniformity of Election Laws.—All laws regulating the holding of elections by the citizens or for the registration of electors shall be uniform throughout the State, but laws requiring and regulating the registration of electors may be enacted to apply to cities only, provided that such laws shall be uniform for cities of the same class.

A true copy of the Joint Resolution.

W. W. GRIEST, Secretary of the Commonwealth.

**MAIN ST., COLLEGEVILLE, PA.**

**—OUR FALL—**

**CARPET STOCK**

Is comprehensive enough to meet the demands of the humblest cottage or finest residence. We think it but reasonable that our many years experience, and close observation of the wear of floor coverings have made us competent advisers in the selection of color and fabric. We advise our customers to figure on something better than they have had before, instead of figuring on cheaper. In this way we gain a good customer—you get satisfaction and save money in the end.

You will probably find our prices "laid on the floor," just about what's usually asked for the carpet alone.

**BRENDLINGERS**

**FARM GARDEN**

CORNHOUSE AND GRANARY.

A Neat and Useful Combination Building For the Farm.

The accompanying illustrations from The Ohio Farmer convey an idea of an improved cornhouse and granary which is described as follows:

The corncrib and grain bins may be made self-discharging without opening any part of the upper portion or without the use of a ladder or steps by placing floor joists at an angle as shown by dotted lines.

The projecting part of the floor is made the bottom of the bins and corncrib that is built upon it and is left open on the side next to the corncrib and grain bins, so that the corn will slide into it. A cover may be hinged to the box so that it may be turned up when grain is taken out.

If one wishes to use a shovel for corn or grain, the opening into the bin or crib may be closed for a space of two feet either in the middle or at each end.
